

We have been learning  
about...

27/5/22

The  
photographer  
came to take  
our pictures.  
Look how smart  
we are!

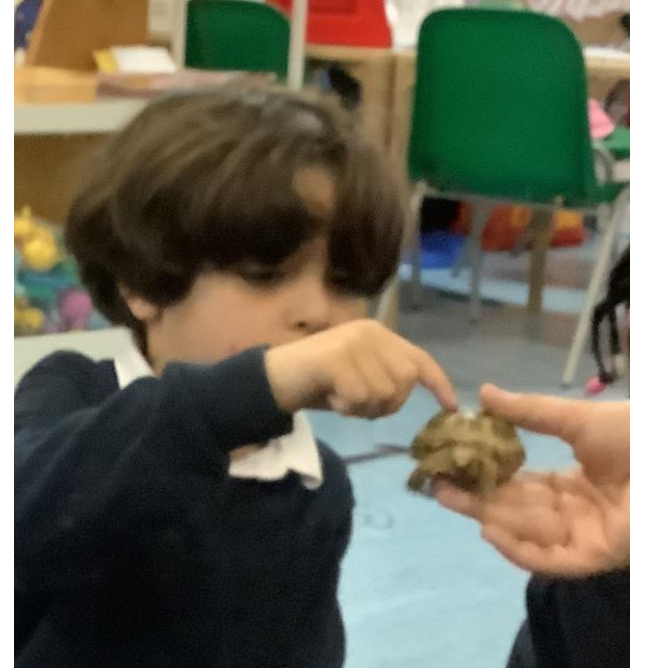

Zoolab brought some animals and insects for us to learn about.....

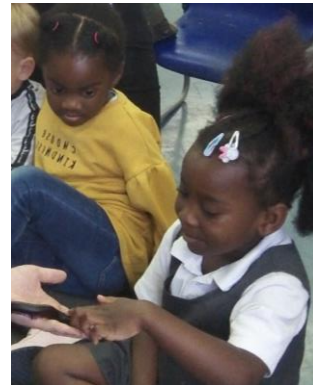

Can you remember what they brought?

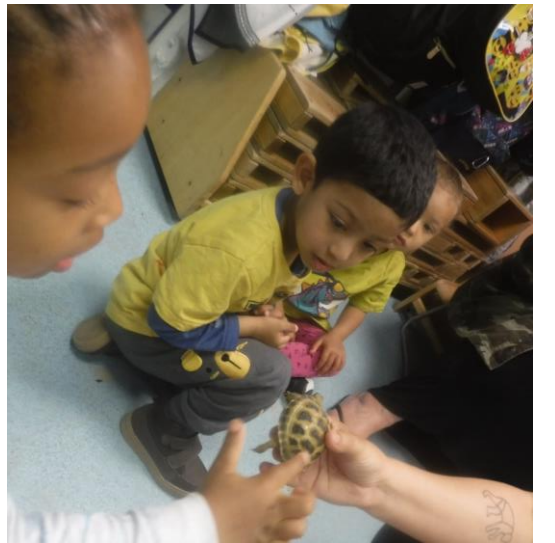

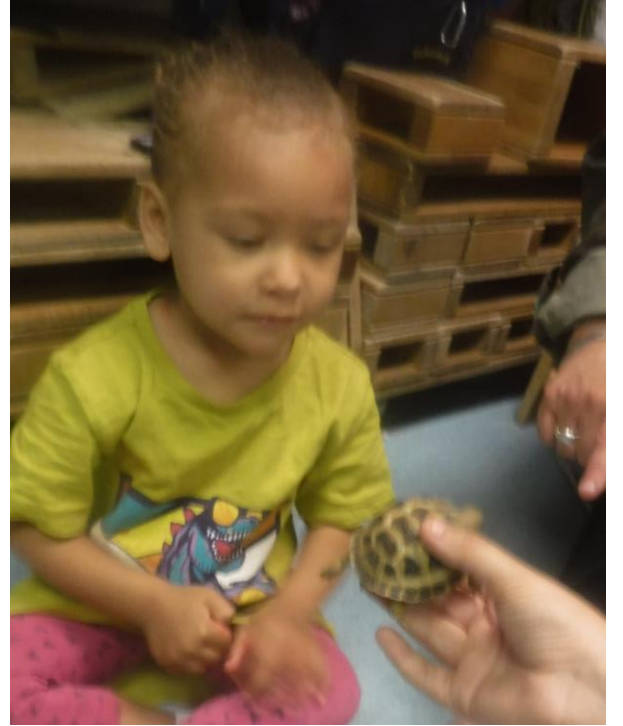

How did they  
feel when you  
touched them?

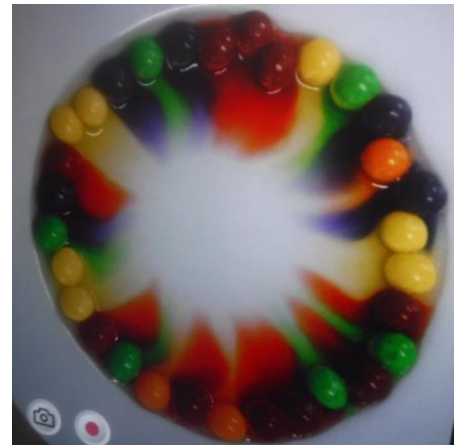

What happened in our  
exploding bag experiment?

We did an experiment with skittles and water.

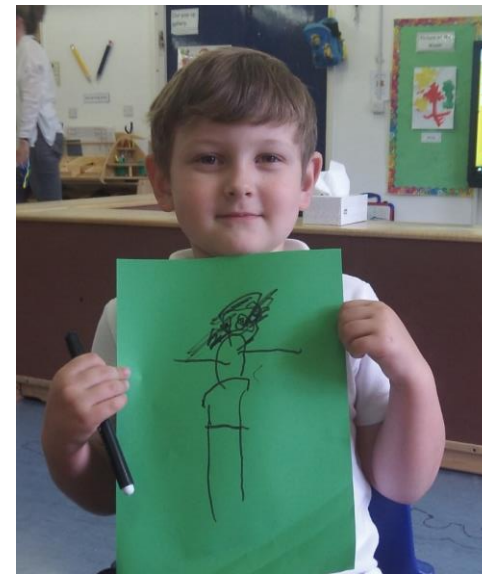

Can you remember what happened? Do you know why it happened?

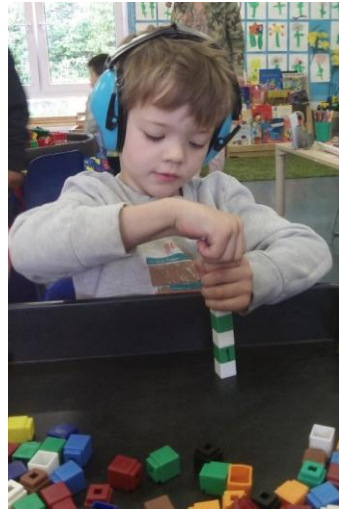

Tell me about your picture.

Tell me about your pattern.

Tell me about your sea creatures. How did you decide which colour to paint it?

We put vinegar into a bottle, put a balloon with bicarbonate of soda on the top and then tripped the bicarbonate of soda into the vinegar. Can you remember what happened? Why did that happen?

We left 4 eggs in vinegar overnight, They were meant to bounce! What actually happened? What did we decide to do next?

We put Mentos in coke and lemonade.....tell me about what happened next? Can you remember why it happened?

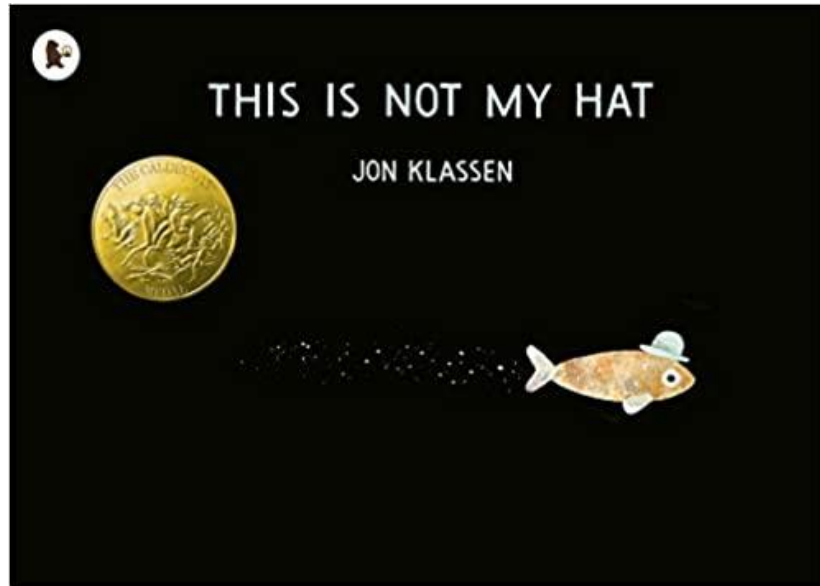

Tell me  
about your  
models.

We talked about whether it was right for the fish to steal the hat. Then we tried to persuade 'the big fish' to give us the hat instead. Can you remember what you said? Did it work?

What else did you learn about this week?
