

We have been learning
about....

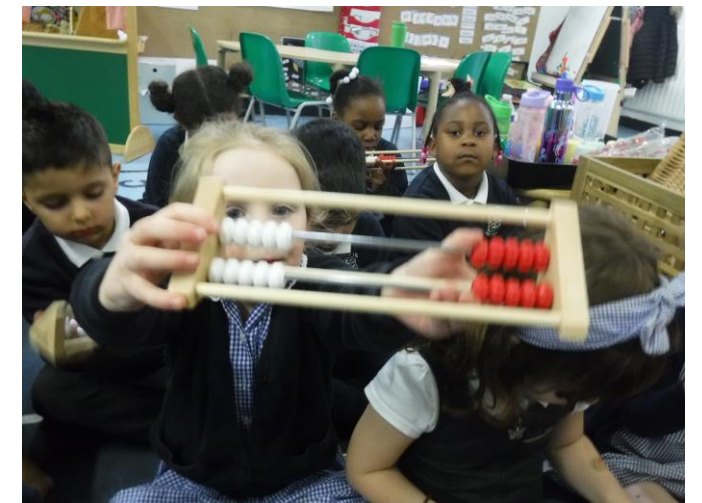

6/5/22

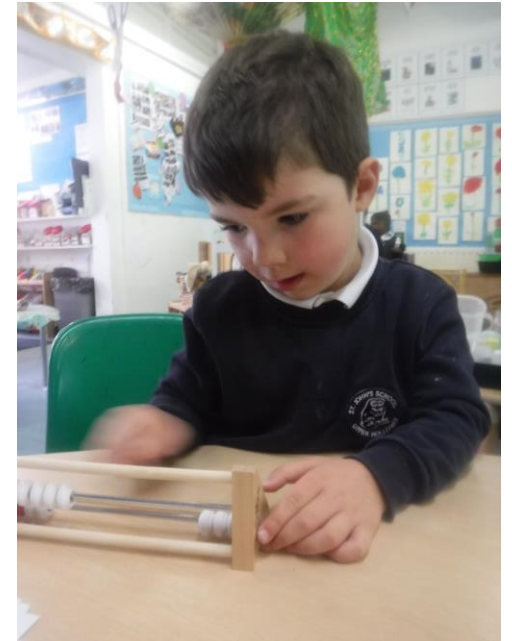

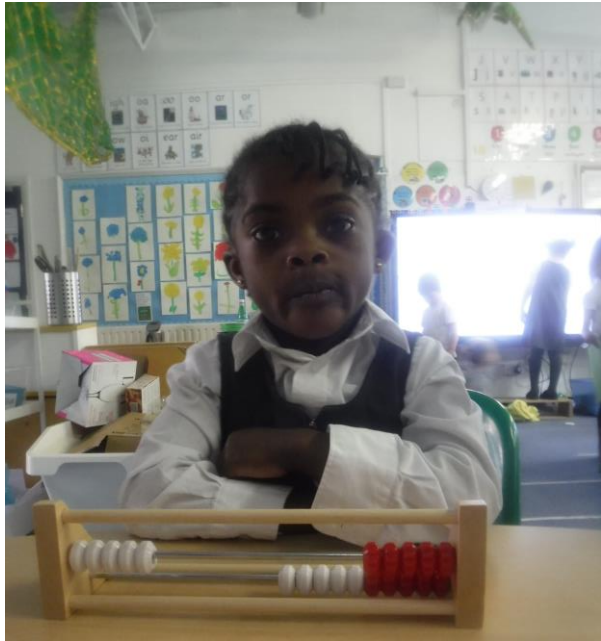

Year 1 took us for a walk around the block to look at different gardens. We found lots of different flowers.

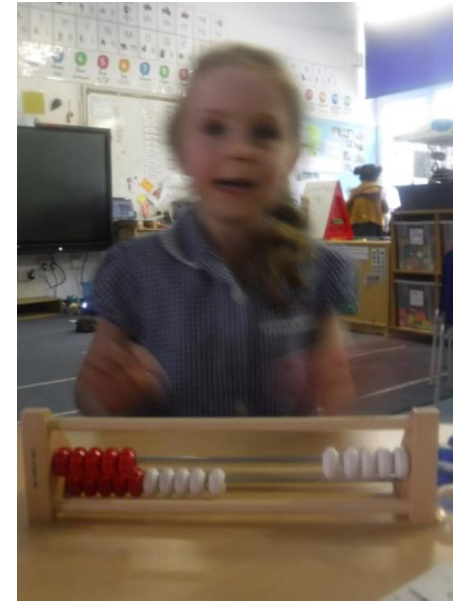

Which was your favourite flower?

We have been learning to use the rekenreks.
Reds to the ready!!

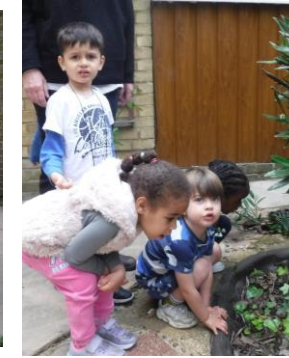

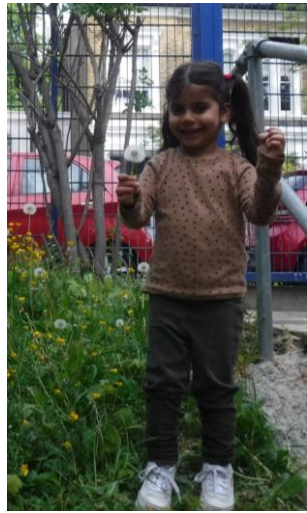

We used the rekenreks to practise our number bonds:
7 is made of.....
6 is made of

We found wild garlic and potatoes in the vegetable beds we are going to plant!

The Nursery went to explore the garden at the front of the school house. They thought about what they would like to see in the garden.

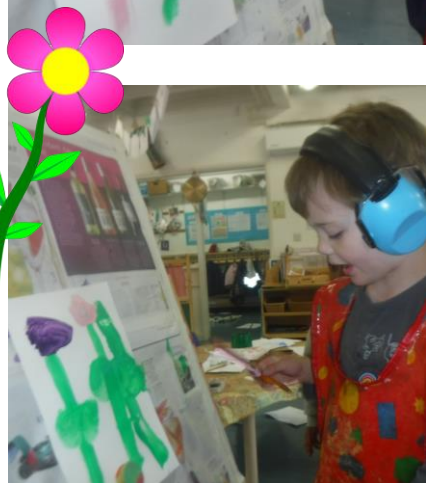

When they were looking at the garden the children asked what was inside the school house.....so we went in to explore!

We thought about the flowers we had seen in the garden and around the school. We painted the flowers we would like to see in our garden!

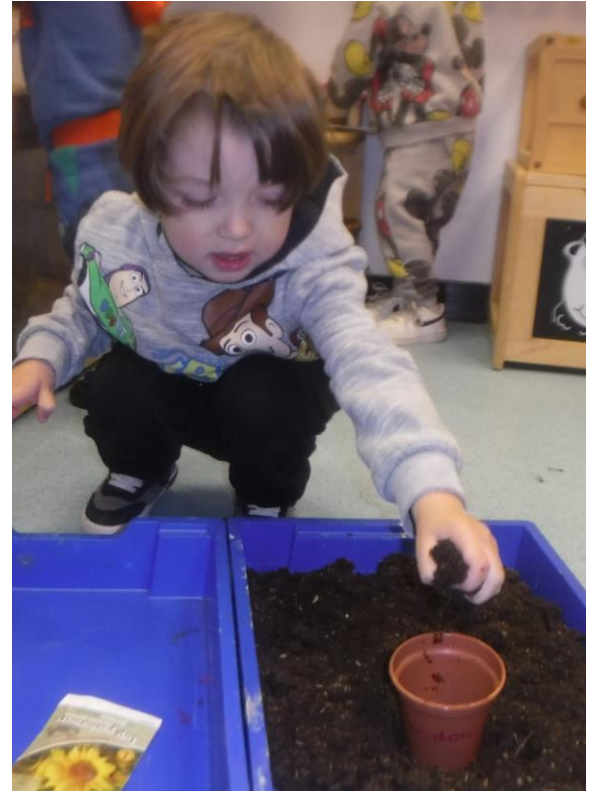

Amazing
buildings!

We planted the sunflowers for the sunflower growing competition!

What else did you learn about this week?
