

We have been learning  
about.....

9.10.20

We did an experiment. How could we stop ice from melting? Each child was given an ice cube in a bag and asked to find a way to stop it from melting. The suggestions were: put it under a hat. Hide it in your pocket. Keep it away from the sun because it will get too warm. Don't touch it because your hands are not cold enough.

Sneak into Nursery and put it in the fridge. Put it in water. Eat it.

**How did your experiment work?**

The Nursery children thought that the best way to stop the ice from melting was to:  
Sing to it. Play with it so it will be happy.  
Put it in your pocket.  
Take it home.

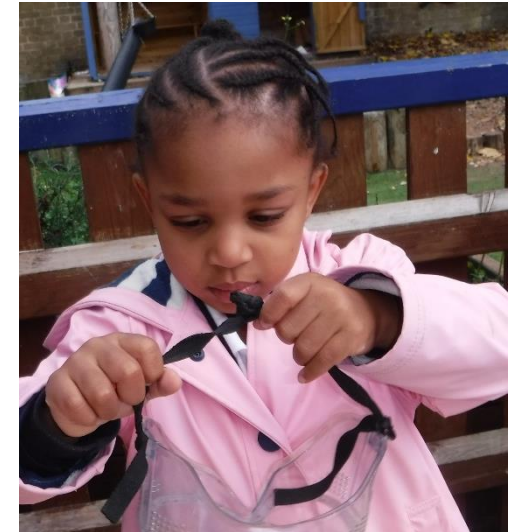

Did any of those suggestions work?

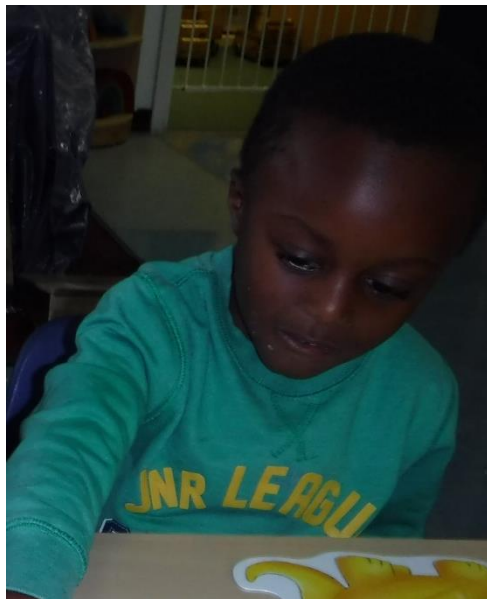

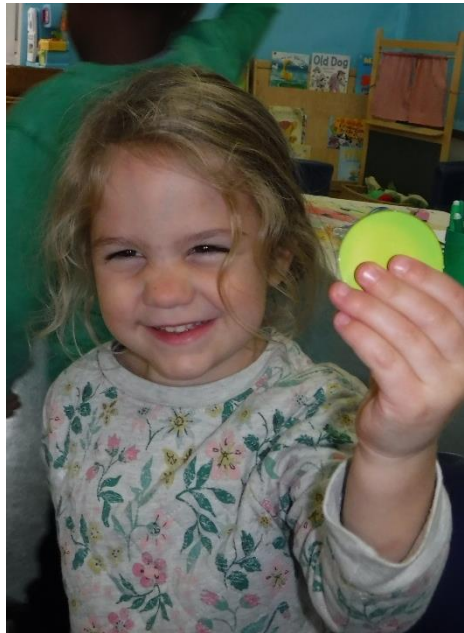

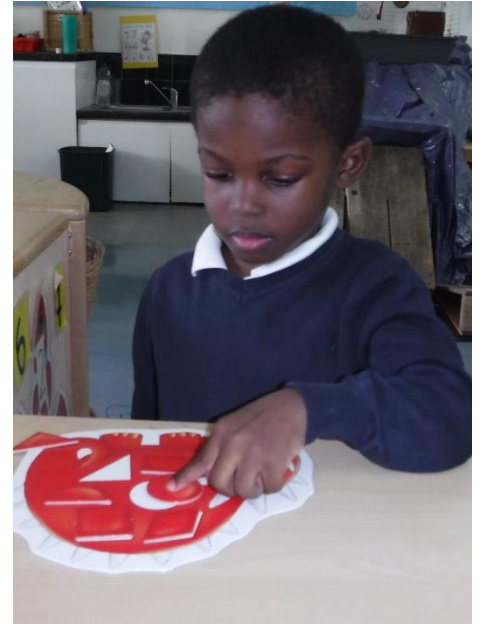

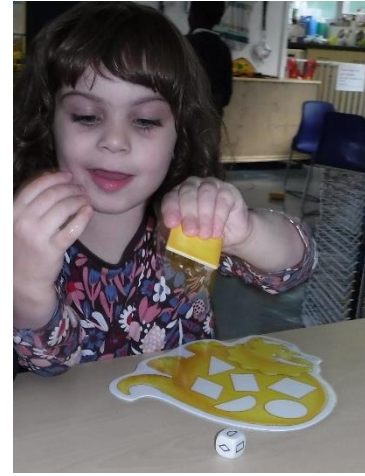

Well done for remembering to put your safety goggles on.

What did you make at the woodwork table?

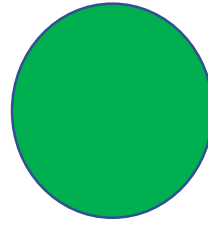

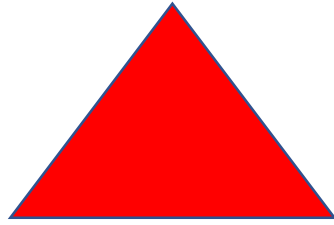

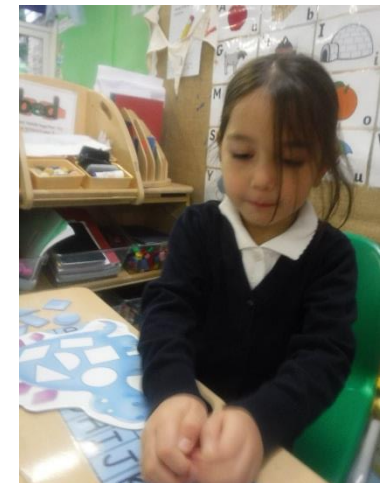

Playing Dotty  
Dinosaurs.  
Did you know  
what the shapes  
were called?

What can you tell me about the shapes? How many sides do they have? How many corners do they have?

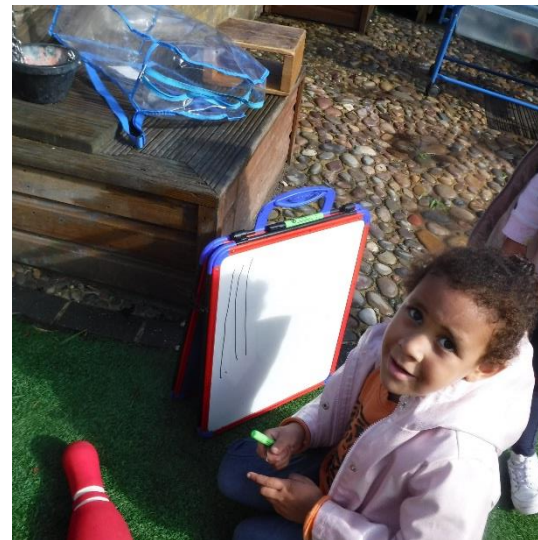

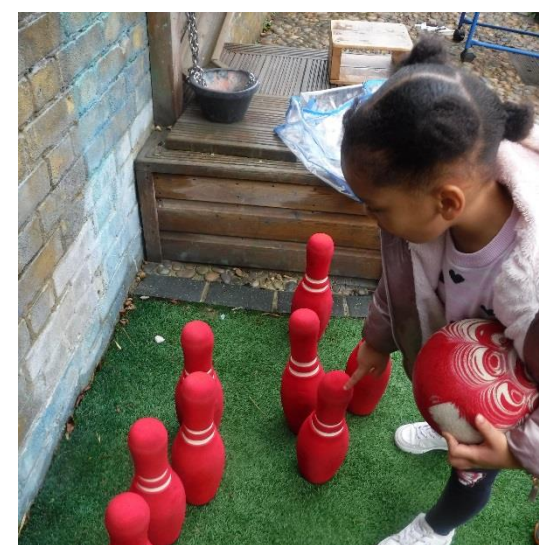

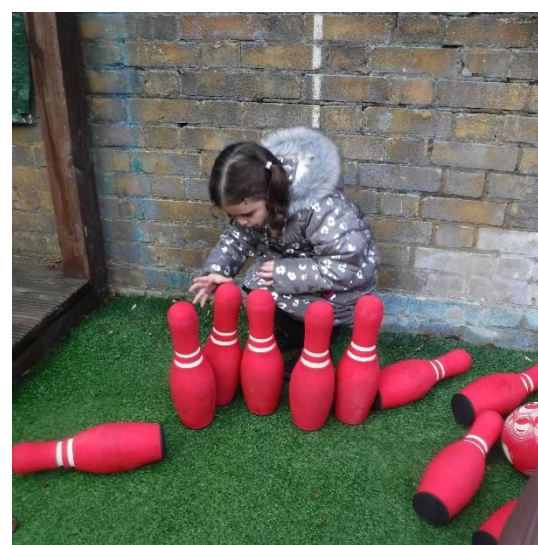

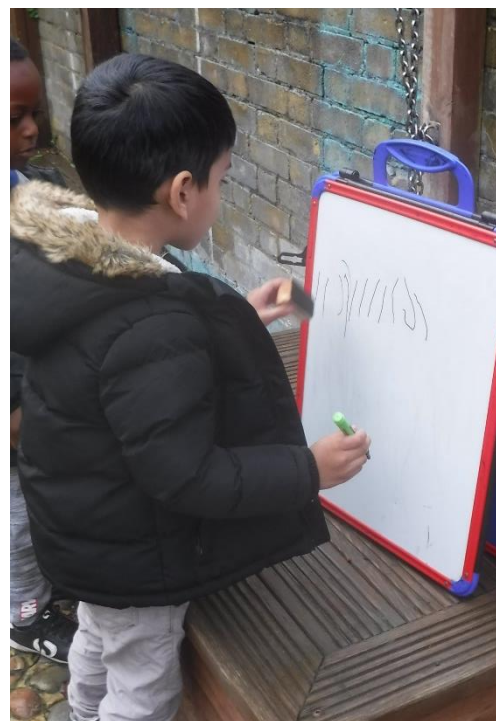

Painting our bear! Where do you think our bear has gone?

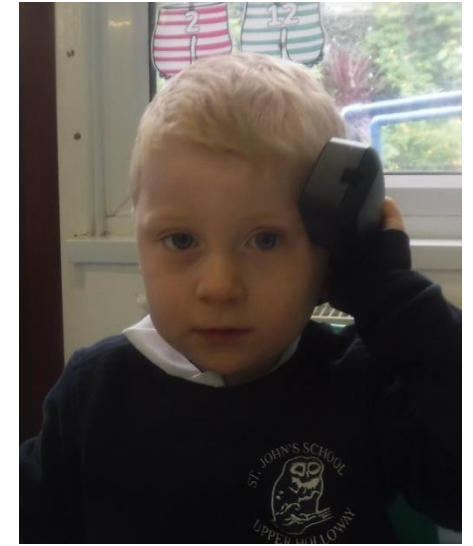

How many  
skittles did you  
knock down?

1 2 3 4 5 6 7 8 9 10

What did you report missing in the lost and found office? Did you find it?

What else did you learn about this week?
