

We have been learning  
about...

13<sup>th</sup> May 2024

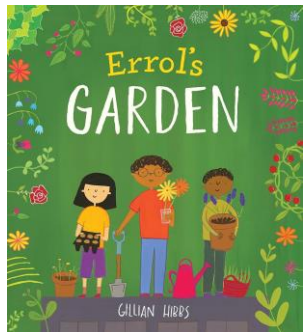

This week we continued thinking about gardening and where plants came from.

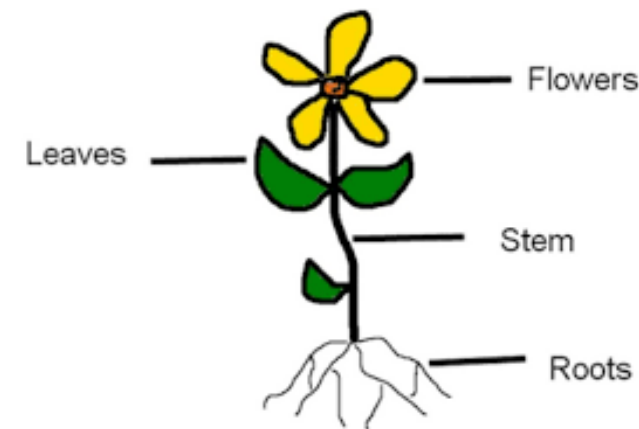

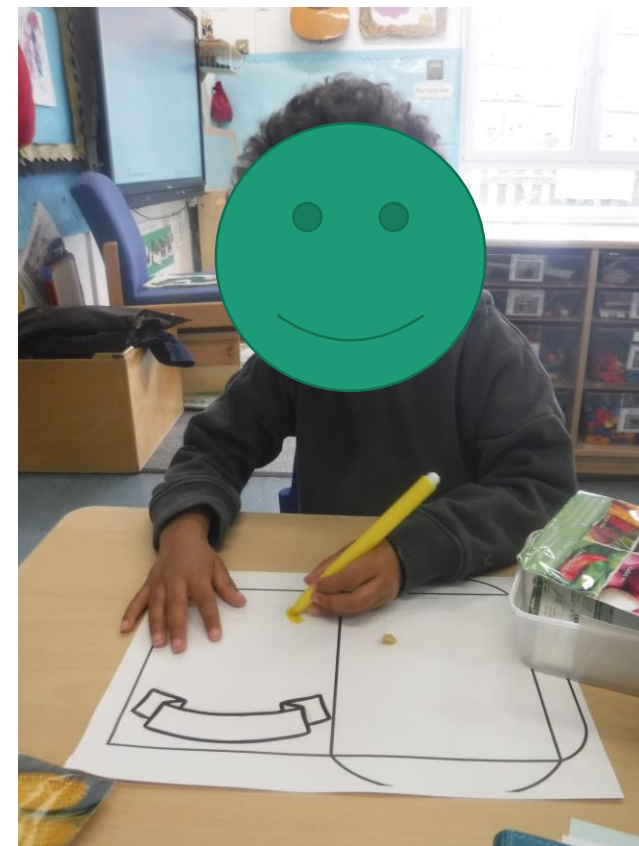

What kind of seed packets did you make? Did you write instructions for how to plant your seeds?

We used a song to help us learn the names of the parts of a plant.  
What did you think your seeds were going to grow into?

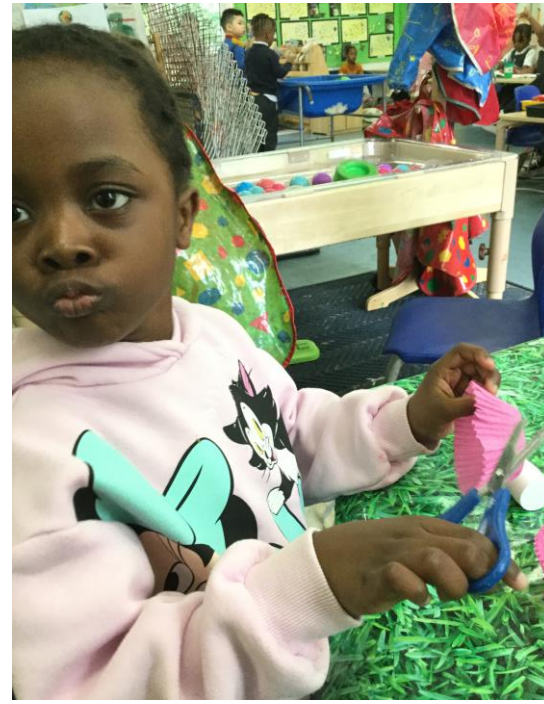

We carried out a snail inspection and raced them. Can you guess how they were cheating?

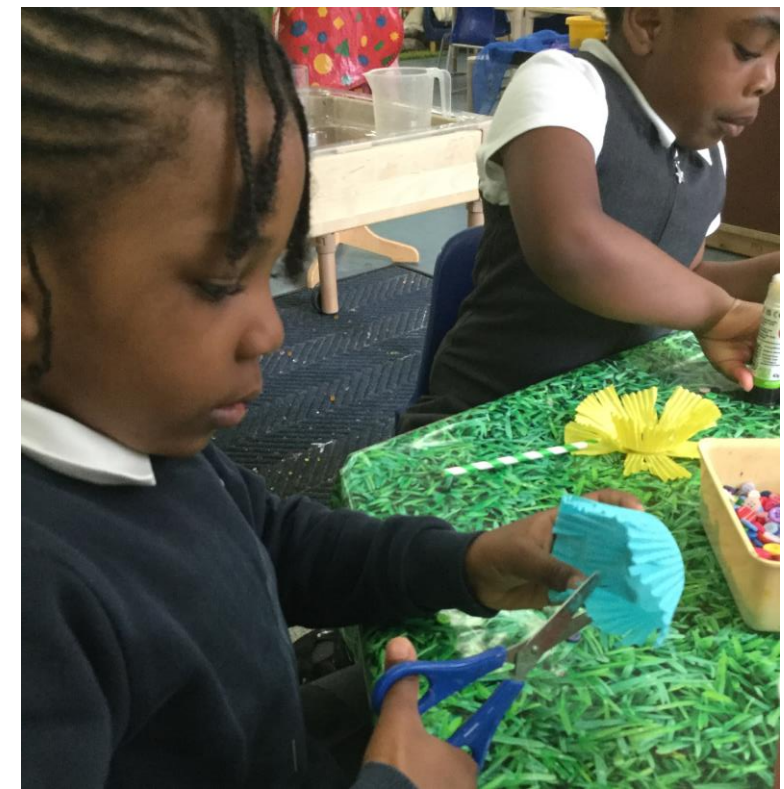

Miss Carol helped us snip and stick to make our own growing plants!

How tall could your flower grow?

What colour flower did you snip?

How tall or short could you make your flower?

Who made the tallest?

We made our own playdough flower gardens!  
Which flowers were the tallest?  
Could you see the shortest?

What else have you been up to?
