

We have been learning about ...

30/06/25 - 04/07/25

We got out the paddling pools! (again!)

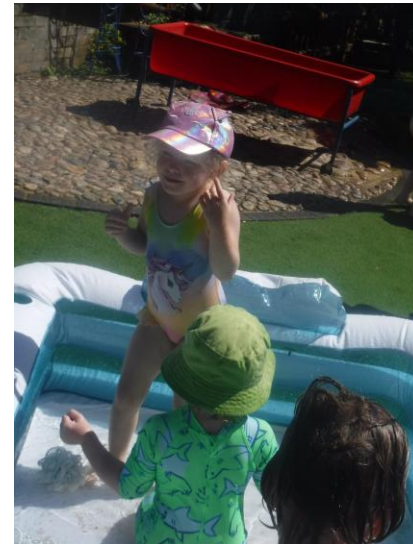

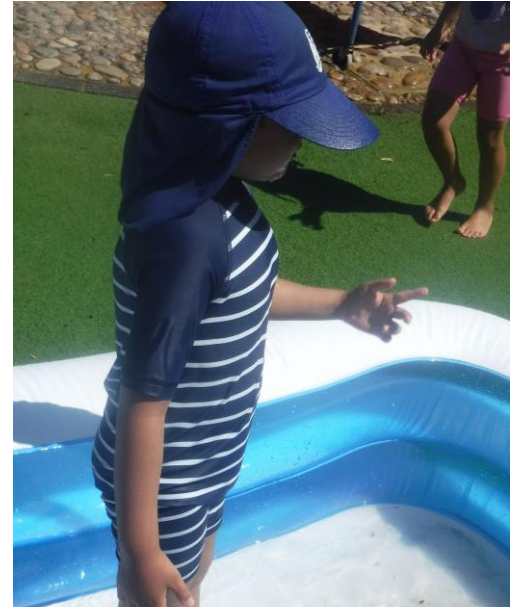

It was so fun to jump and splash with Reception!

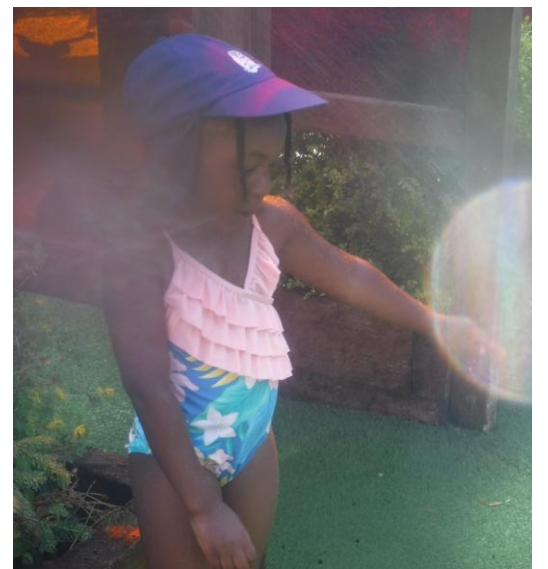

Did you manage to dip your whole body in?!

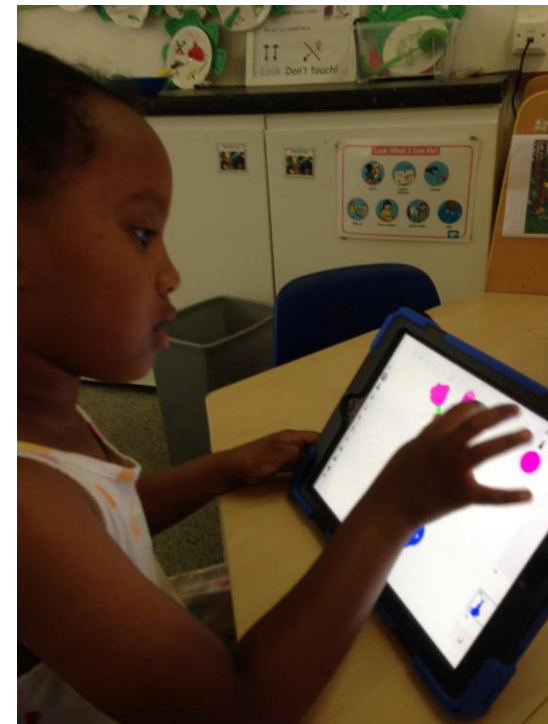

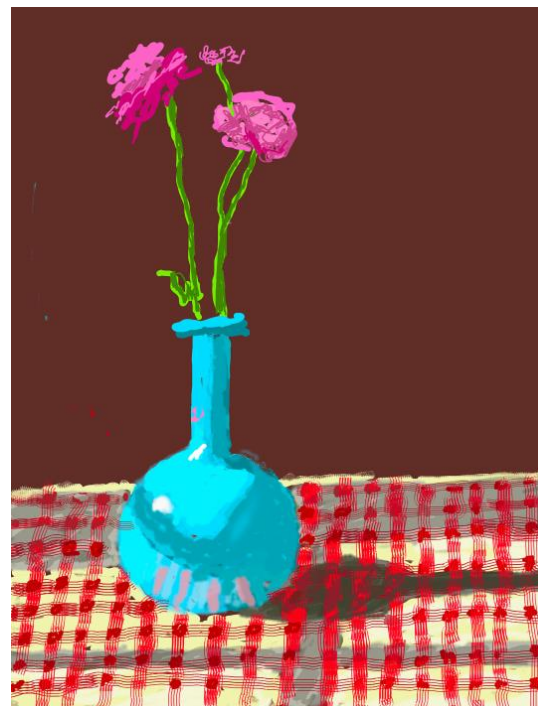

We all had so much fun! It really helped us cool down!

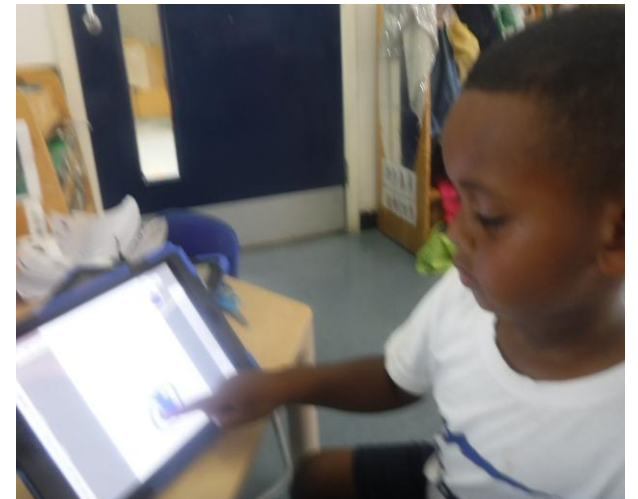

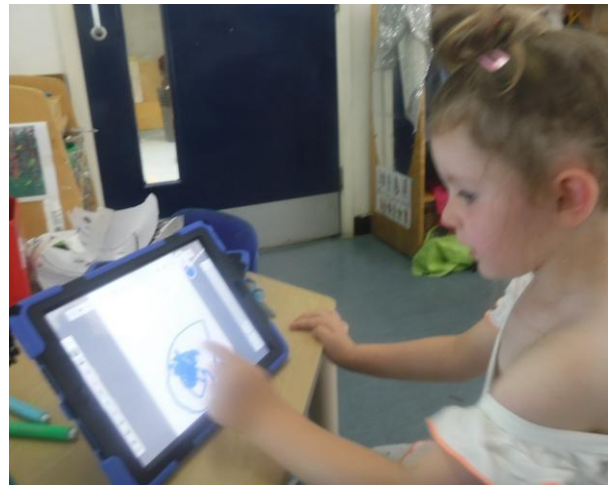

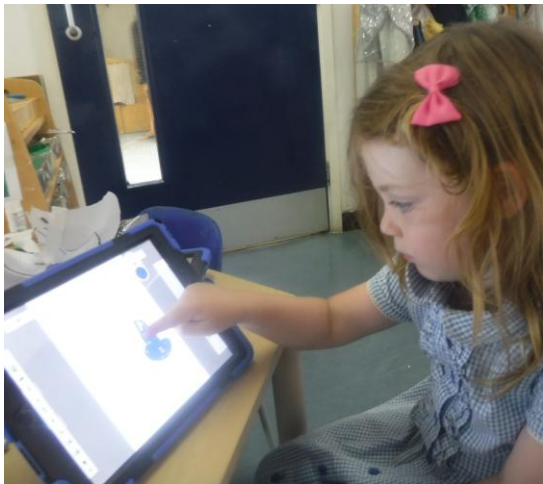

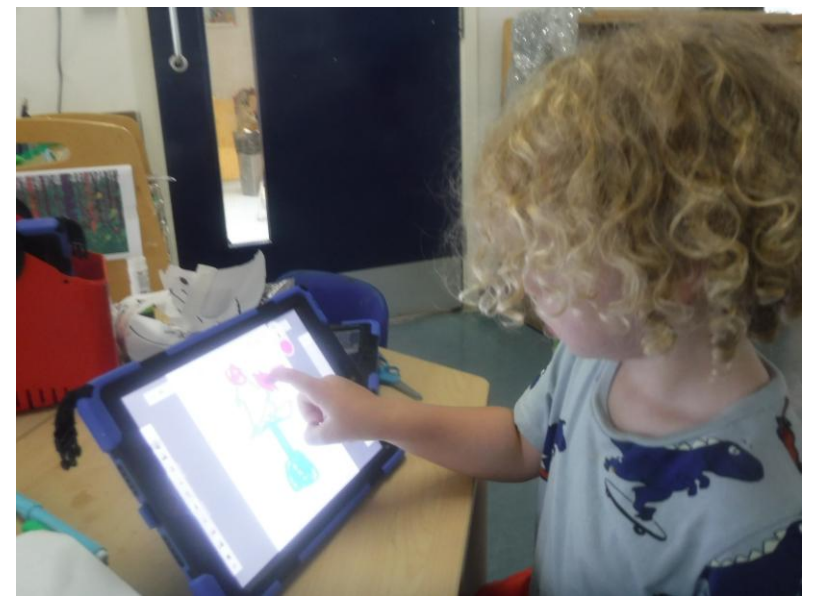

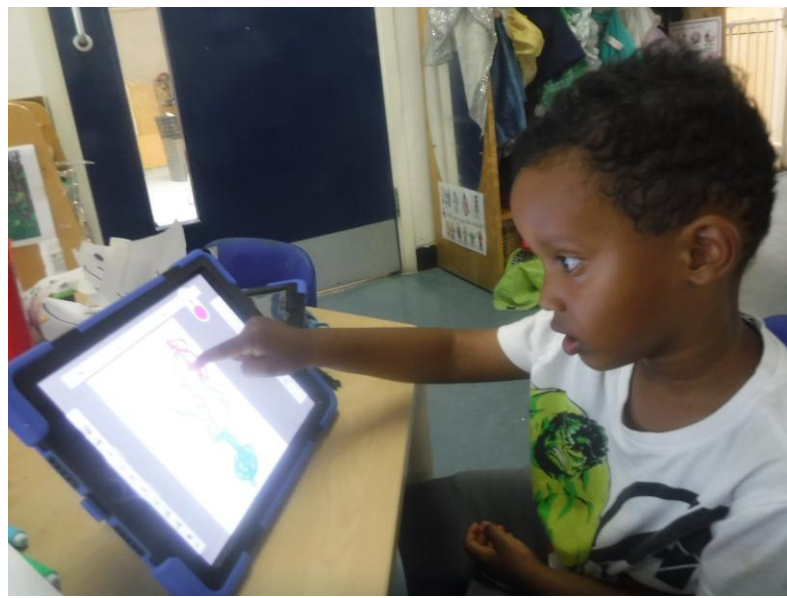

How many Nursery children
can you fit in a paddling
pool?

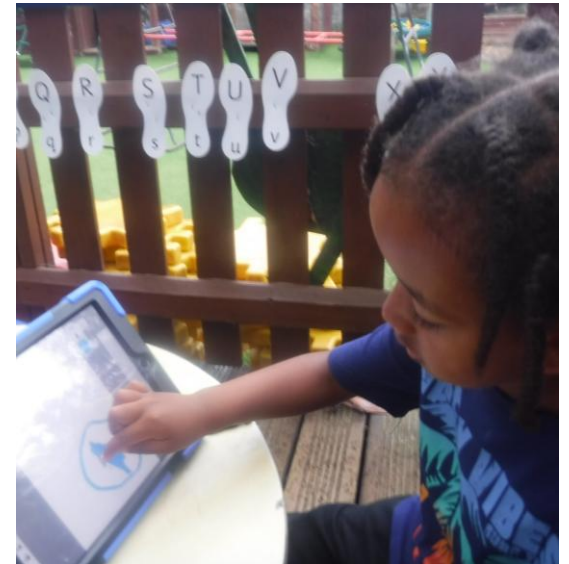

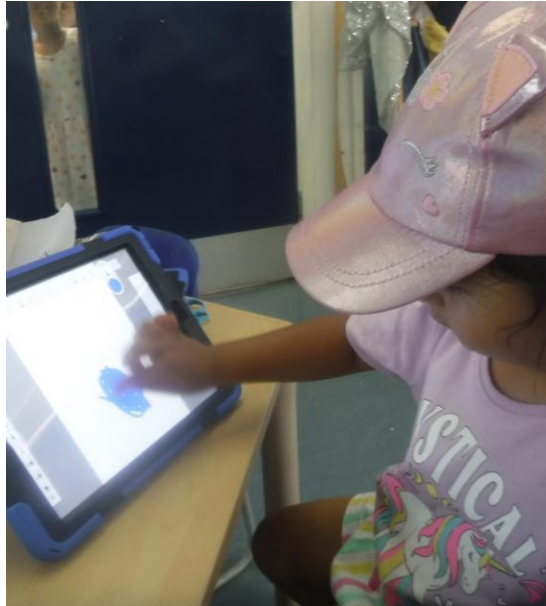

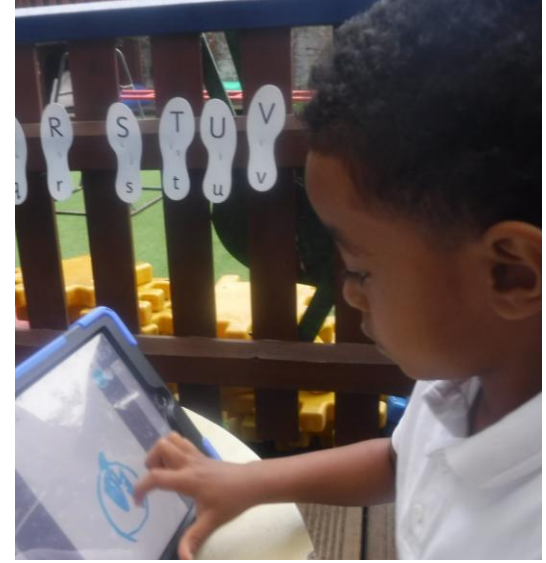

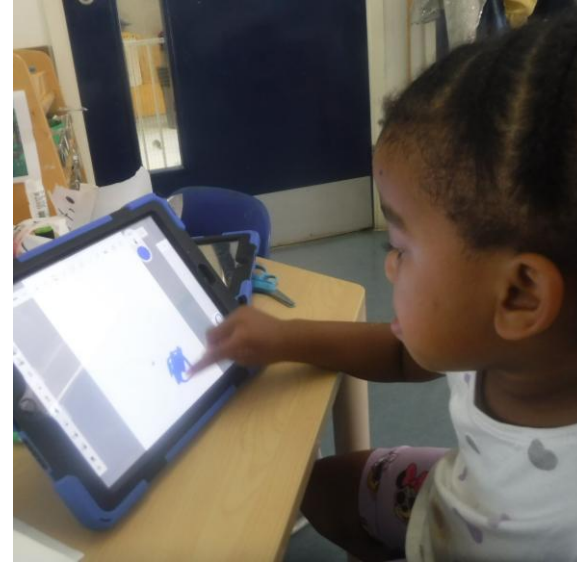

We drew
versions
of David
Hockney's
flower
picture

We have been using a drawing programme on the Ipad for Art and Science week. What shapes did you have to draw to make your flower picture?

Could you match the colours to the picture Miss Carol showed you?

We visited St John's church to see Rev. Matt and to think about what makes the church special.

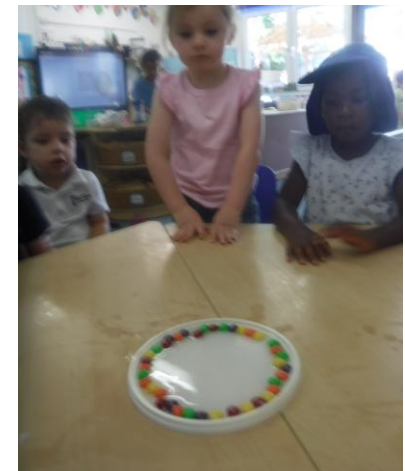

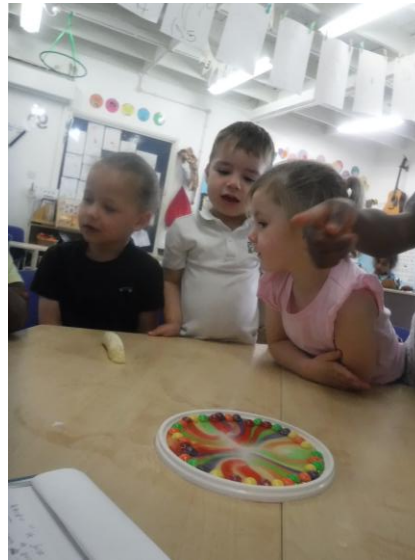

We explored colour mixing with our skittles experiment. What happened to the skittles when they were left in the water? What did you think would happen? I wonder why the skittles did that?

How many different colours could you see? Did the colours mix like paint?

Do you
think
the
skittles
will still
be tasty
now?

We finally let our
butterflies go.
We hope they will
make lots of new
butterfly friends!

What else did you do?
