

# What we have been learning about...

5th January to 9<sup>th</sup> January 2025

It's been great coming back to school and learning with our friends!

We have been exploring the snow and ice in the Early Years garden. We used all our senses and tried to solve some slippery problems!

We used magnifying glasses to look really closely at the ice. There were lots of leaves and flowers frozen inside the ice. Did you see the little bubbles in there?

There have been lots of new things to explore this week!

It was someone's birthday! Can you guess how old they are now?

A group of children are playing in a green artificial turf playground. Several children are holding and spinning hula hoops. One child in the foreground is wearing a grey jacket and has a blue and yellow hula hoop around their waist. Another child in the center is wearing a blue jacket with a colorful pattern. To the left, a child in a green jacket is also playing with a hula hoop. In the background, there are various playground equipment items like a red and yellow toy car, blue and yellow exercise balls, and a red tricycle. The scene is outdoors with a wooden fence and some trees in the distance.

**What else have you been up to?**
